Lorazepam 1mg iv

Lorazepam, sold under the brand name Ativan among others, is a benzodiazepine medication. It is used to treat anxiety disorders, trouble sleeping, active seizures. Single doses of lorazepam usually last for 6-8 hours. More here on lorazepam duration of action, time in the body and how long lorazepam effects last here. ATIVAN (Lorazepam) drug information & product resources from MPR including dosage information, educational materials, & patient assistance. Not technically. It's about half the strength of xanax, but nothing beats a good 'ol IV of lorazepam when you're in the hospital ;) According to most benzodiazepine.
